

UWD Series

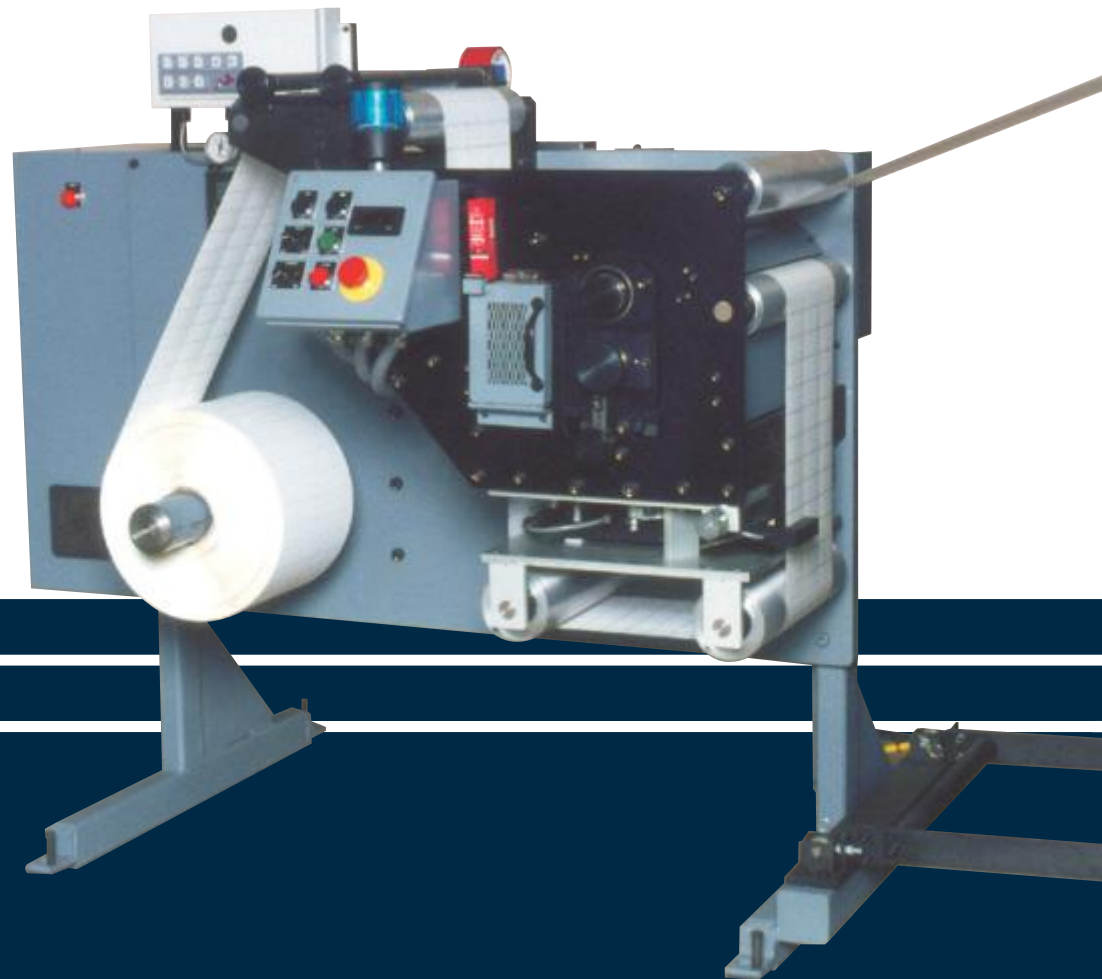

Single Position Driven Unwind

Overview

The UWD is designed for use with KTI turret rewinders to create a complete, stand alone, off-line finishing system. The machine is easy to integrate and use with existing KTI equipment and provides a combination of high performance and robust construction.

Standard Features

- Cantilevered pneumatic spindle
- Automatic stop at end of roll
- Drive feed roller with nip
- Bi-directional unwind capability
- PLC Controls with touch screen
